

Take the Government out of the Abortion Industry

(Unborn Baby 18 Weeks)

To our Country Supervisors, State Legislators, and all Public Officials:

The Government is in the abortion industry, please take it out!

Whereas: “ The care of human life and happiness, and not their destruction is the first and only legitimate object of good government.” Thomas Jefferson. **Whereas:** Public officials at all levels have a fiduciary responsibility to ensure that taxpayer money is expended to promote the safety and protection of those who cannot protect themselves. **Whereas:** Organizations promoting and performing abortions have made demands on public funds. These abortion promoters under the guise of “family planning” or “women’s health” have received considerable taxpayer monies that are an integral part of their business. **Whereas:** Many abortion promoting organizations lecture the public, claiming that the government not be involved in the abortion issue.

WE ARE RESOLVED: Given the great burden of government debt, liabilities, and expenditure of public assets, we urge you to halt funding the abortion industry and its infrastructure.

Note: CPLC removes all email addresses before delivering petitions to legislators. CPLC needs your e-mail to inform you of how your representatives vote and to help **you** hold them accountable. We do not sell this information.
